

PROOF - TECH

Watertight roofs for years to come

PROOF - TECH

Proof-Tech is a manufacturer of liquid roof membrane HYDRONYLON®. We develop, produce and install our own system solutions for commercial, industrial and residential clients. Our range of products have been successfully used in projects across the Europe.

We set, implement and keep enhancing Quality Management System and Production Control as well as all aligned processes in accordance with PN-EN ISO 9001:2015 and IMBiGS-KOT-2017/0001.

Why Proof-Tech?

EU PRODUCTS

CERTIFIED CONTRACTORS

ENVIRONMENTAL FRIENDLY SOLUTIONS

**Why
Proof-Tech?**

Our products are manufactured based on the latest technologies, in accordance with current requirements. We offer our clients comprehensive support and services at the highest level. Because of our pricing policy and high-quality products, we are a reliable partner in the implementation of small and large enterprises throughout the country and the group of satisfied customers is constantly growing.

HYDRONYLON®

Waterproofing membrane for roof renovation

HYDRONYLON® is used to produce hydro-insulating and coated roofing. It is applied in liquid form on bitumen, asphalt, and felt roofing. HYDRONYLON® is an ideal solution for large-scale industrial and commercial buildings as well as residential buildings.

HYDRONYLON® is perfect for renovation and refurbishment projects as well as for new built.

PROOF - TECH

HYDRONYLON® is best used for:

- ✓ APPLYING WATERPROOFING MEMBRANES
- ✓ ROOF MAINTENANCE
- ✓ IMPROVING ROOF'S APPEARANCE
- ✓ LOCALISED WATERPROOFING ESP. AROUND CHIMNEYS, VENTS, PARTITION WALLS, PARAPETS OR OUTLETS
- ✓ CREATING COOL ROOF EFFECT
- ✓ CREATING NEW PROTECTIVE SURFACE

Modernity

An innovative way of renovation, sealing and maintenance of existing roofing – no need to take the present layer off!

Perfect protection

Provide ideal protection for roofs with complex shapes. They're characterized by excellent adhesion to renovated surfaces, high ductility, shape memory and water tightness.

Resistant to weather conditions

They are resistant to high temperature amplitudes and UV radiation.

A breakthrough in the "Cool Roofs" technology!

HYDRONYLON[®]
QLR ONE

It is a unique proprietary recipe that will work on a roof of any shape and any angle of inclination. Technology resistant to changing temperatures, will significantly extend the life of your roof.

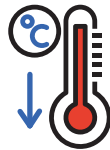

HYDRONYLON® QLR ONE is a seamless coating ensuring 100% watertightness. It is resistant to UV radiation, which eliminates the formation of urban heat islands and has a positive effect on our ecology.

HYDRONYLON® QLR ONE

REFLECTS UV RAYS
